

Little brown bat

👤 Meet Brownie. **She** was born just six weeks ago.  
**She** can already take care of herself.

👤 **She is a bat.**

☞ Some people think bats are birds, but they are mammals. You are a mammal too. So is a dog. What else is a mammal?

☞ A cat!

👁️ Why do people think bats are birds? Maybe it's because they have wings and they can **fly**.

Brownie's wings look like four "fingers" with skin stretched between them.

👁️ **She can fly.**

☁ During the summer, Brownie lives under the roof of a barn. She lives there with many other mother bats and babies.

☁ It is hot.
