

☹️ The cubs that are wrestling are so very **small**.
But soon they will grow into bears that are tall.
Are the bear cubs big?

☹️ **No, the bear cubs are small!**

🕒 The **bears** like to hibernate all winter long.
To wake them up early would surely be wrong.
Come spring they will rise and find something to eat.
Perhaps now they're dreaming of honey, so sweet.

🕒 **Shhh! The bears
are sleeping!**
